

ABOUT ME

I am a fan of good dance music that also has some electronic influences.

Actually, I like many different genres but there are some that I prefer because they wouldn't get monotonous.

Hence this mix of different performers with the occasional hit from the good old days.

If you understand Dutch you will recognize where the name "HAK & TAK" comes from.

The mixes aren't perfect, but they aren't meant to be. I wanted to try out a platform that should allow users to discover music they forgot or even never heard.

I'm from Antwerp, the city of electronic dance music EDM, where you can enjoy a great atmosphere, ambiance and good food.

The video clips could get a little more attention. Although these days I see a lot more well-made clips on YouTube. It prompted me to do the same. Although with your own limited resources, but without your own images - because there is so much to be found on the net - you cannot always get through the policy of many platforms.

I work with patreon.com for this and also with my own site which was created by self-study and not for professional purposes. It allows me to continuously learn what the possibilities are on the net and what people are interested in. What is already clear to me is that in this society it all has to go very quickly.

I hope to count on some attention because I do this just for fun.

THANKS.

HAK & TAK
